

Hemavarni S

About Me

I am a third-year Computer Science and Engineering student at VSB College of Engineering and Technical Campus, Coimbatore. Passionate about technology, I enjoy coding, reading, listening to music, and exploring new recipes. I am a quick learner with an optimistic mindset and an easy-going attitude. I strive to build meaningful solutions that can make a real impact.

Skills

- HTML
- CSS
- MERN Stack
- Python
- Java
- Data Structures and Algorithms

Interests

- Coding innovative projects
- Listening to music
- Reading books and articles
- Cooking and experimenting with new dishes

Projects

1. Medical Diary

A health emergency assistant app that stores medical history securely using Aadhaar-based biometric authentication. During emergencies, it allows quick access to vital health data using the user's biometrics, connecting with nearby hospitals for rapid aid.

2. TailorMade

An innovative e-commerce platform for fashion that offers a virtual try-on experience. Users can try clothes digitally using their 3D avatars, enhancing personalization and reducing returns.

3. CollEdge

A platform designed for college students and educators to share and access academic resources such as notes, papers, and materials. Encourages collaboration and eases learning.
